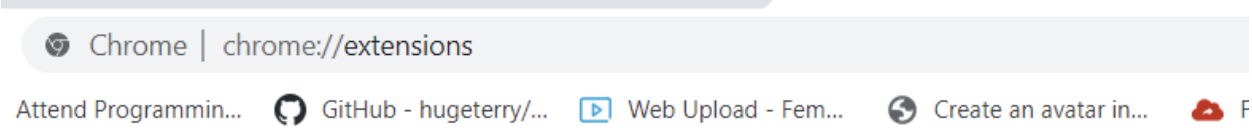
Download the latest version of Extension from -

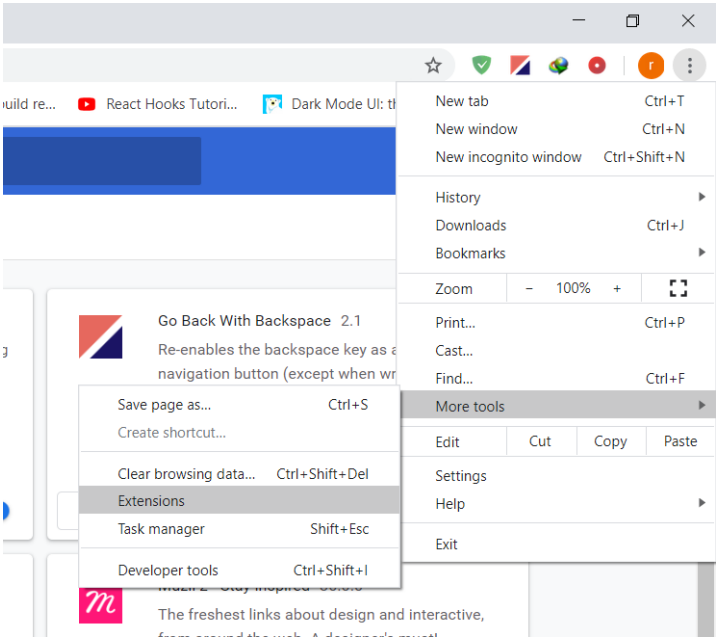
https://randomguy1920.github.io/jshost/xxtn.zip

Load unpacked Chrome Extensions –

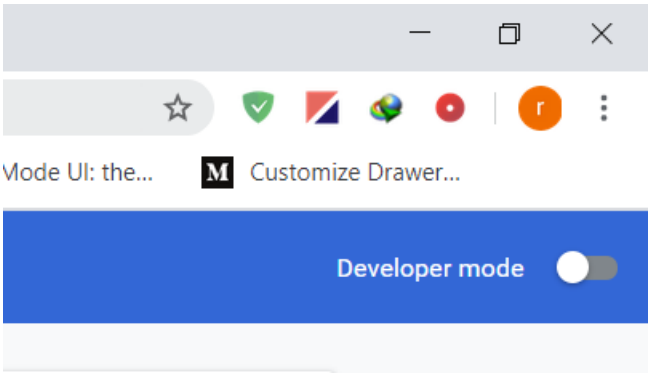
1. Go To chrome://extensions/ or Options -> more tools -> Extensions



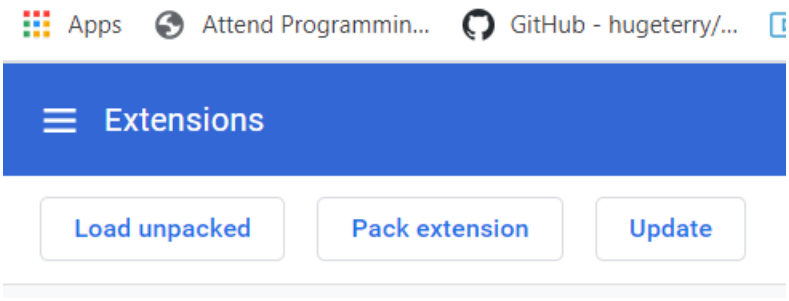
OR



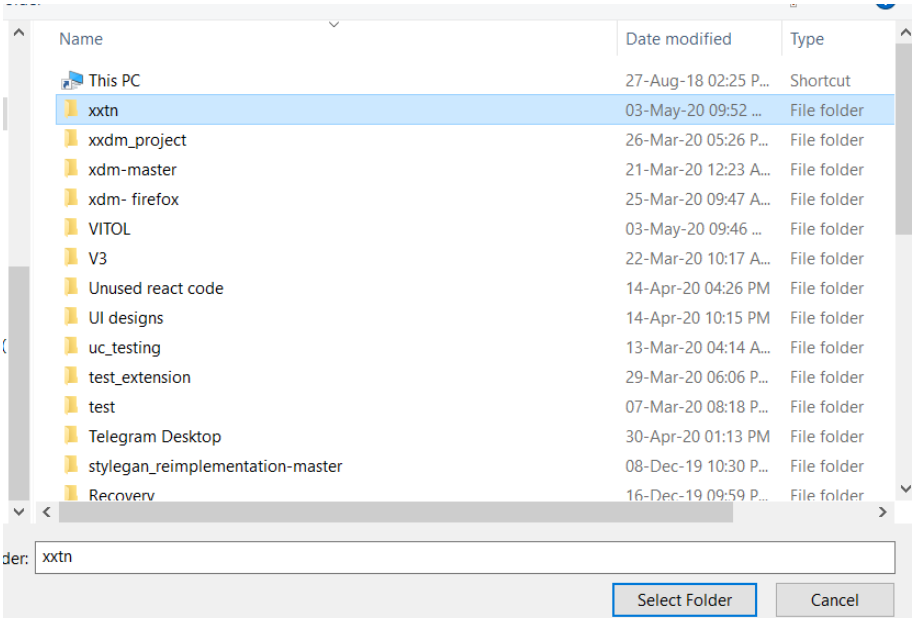
2. Toggle the Developer Mode option



3. Click the Load Unpacked Button



4. Open the extension folder



5. Chrome may ask to disable the developer mode when you restart. Doing so will remove the extension.
6. To update the extension, download the updated version from –

   https://randomguy1920.github.io/jshost/xxtn.zip

   Extract it.
   Click remove and follow the same steps as mentioned above
